For Southeast Asia's modern slavery is still high seas

On International Human Rights Day, testimonies from Southeast Asian fishing vessels, plying the remote waters for seafood.

By Zafrah Zain

Tuesday 10 December 2019

For nearly six months aboard the Han B and other migrant fishermen drank, cooked and snowed from the water that came out of an air-conditioner.

A couple of the workers died from consuming the contaminated food and water, but according to Kukoh, the boat captain's response would always be the same: "It's okay to die, as long as the family gets money from us."

Is There Slavery in Your Seafood?

By Turtle Island Restoration Network | January 29, 2020 | Hawaii, Longlines, Marine Mammals & Seabirds, Sea Turtles, Sharks

No Comments

As we near the end of National Slavery and Human Trafficking Prevention month, I wanted to remind our dedicated supporters like you that despite the fact that we're living in the year 2020, slavery and human trafficking still exist globally – and indeed, woefully, in the United States as well.

In fact, there may be slavery in your seafood.

Tuna, marlin, shark, sailfish, and swordfish commercially caught in Hawaii is often fished via destructive longline gear by vulnerable workers enduring human rights abuses. Fish marketed as "sustainable seafood produced by Hawaii's hard-working fishermen" is sold at premium seafood restaurants across the country – and in grocery stores from Whole Foods to Costco.

Yet, if you are buying Hawaiian tuna, marlin, shark, sailfish or swordfish in the US, it is likely caught by foreign fisherfolk facing squalid living and working conditions without basic labor protections or the ability to seek legal recourse. In some instances, workers are enduring slavery enabled by the US government via a loophole for foreign fisherfolk targeting the aforementioned species to be exempted from basic labor protections.

COMMON VISION

2020 Agenda – SDGs:

SDG 1 – End poverty in all its forms everywhere

SDG 2 – End hunger, achieve food security and improved nutrition and promote sustainable agriculture

SDG 5 – Achieve gender equality and empower all women and girls

SDG 8 – Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

SDG 10 – Reduce inequality within and among countries

SDG 14 – Conserve and sustainably use the oceans, seas and marine resources for sustainable development

SDG 17 – Strengthen the means of implementation and revitalize the global partnership for sustainable development

THE CODE OF CONDUCT FOR RESPONSIBLE FISHERIES

- Approved in 1995 by more than 170 países
- Includes: wild capture and aquaculture
- Principles and international standards for responsible practices
- Recognizes social and cultural importances

25 Anniversary of the Code of Conduct for Responsible Fisheries
